

Broadband Access and Speed Survey

March 2021 | Rickey Barnett

In an effort to advocate for greater broadband access across the state, the WLA Advocacy Committee encourages members to both take and share the [State's Broadband Access and Speed Survey](#) with their communities. Reliable, high-speed broadband is critical for increasing equity of access to educational opportunities and economic stability. This 1-minute survey assists the State Broadband Office in identifying gaps in high-speed internet service and infrastructure needs. This information is critical in advancing the goal of universal broadband access in the state by 2024. Also, be sure to check out the office's [Drive-in WiFi Hotspots Location Finder](#) to quickly find free WiFi access across the state.
