

CENSUS 101: WHAT YOU NEED TO KNOW

The 2020 Census is closer than you think!
Here's a quick refresher of what it is and why it's essential that everyone is counted.

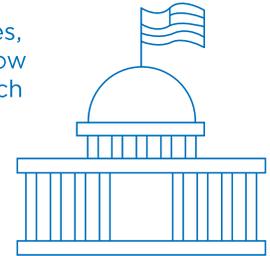

Everyone counts.

The census counts every person living in the U.S. once, only once, and in the right place.

It's about fair representation.

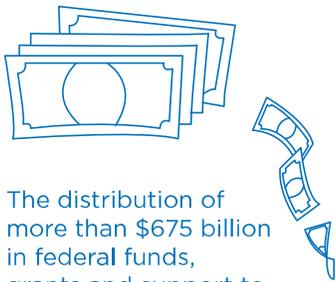

Every 10 years, the results of the census are used to reapportion the House of Representatives, determining how many seats each state gets.

It's in the constitution.

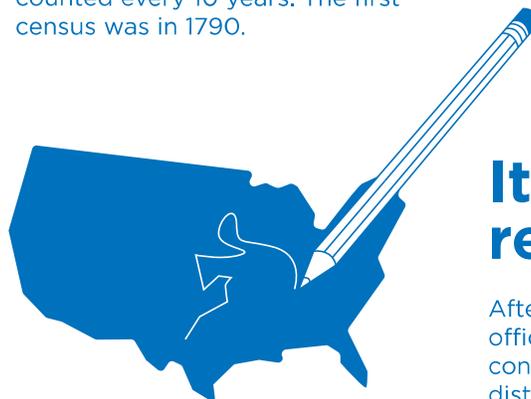

The U.S. Constitution mandates that everyone in the country be counted every 10 years. The first census was in 1790.

It's about \$675 billion.

The distribution of more than \$675 billion in federal funds, grants and support to states, counties and communities are based on census data.

That money is spent on schools, hospitals, roads, public works and other vital programs.

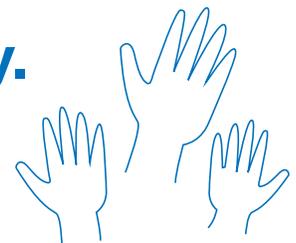

It's about redistricting.

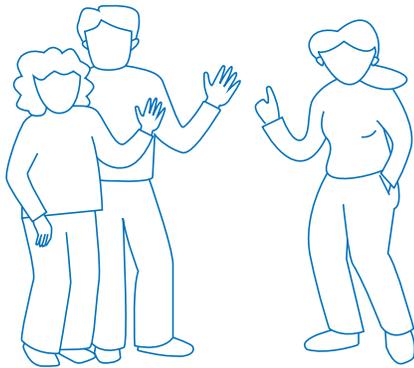

After each decade's census, state officials redraw the boundaries of the congressional and state legislative districts in their states to account for population shifts.

Taking part is your civic duty.

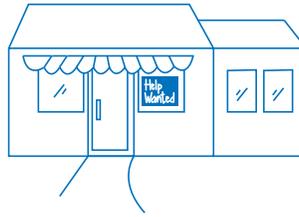

Completing the census is mandatory: it's a way to participate in our democracy and say "I COUNT!"

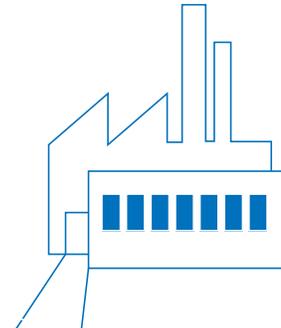

Census data are being used all around you.

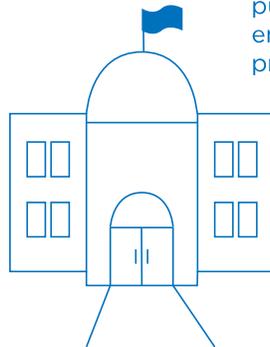

Residents use the census to support community initiatives involving legislation, quality-of-life and consumer advocacy.

Businesses use census data to decide where to build factories, offices and stores, which create jobs.

Local governments use the census for public safety and emergency preparedness.

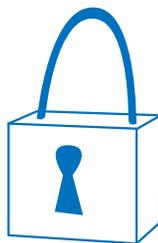

Real estate developers use the census to build new homes and revitalize old neighborhoods.

Your privacy is protected.

It's against the law for the Census Bureau to publicly release your responses in any way that could identify you or your household.

By law, the Census Bureau cannot share your answers with any other government agency.

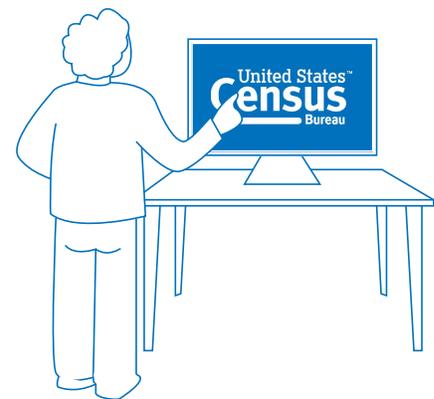

2020 will be easier than ever.

In 2020, you will be able to respond to the census online.

You can help.

You are the expert—we need your ideas on the best way to make sure everyone in your community gets counted.

The 2020 Census and Confidentiality

Your responses to the 2020 Census are safe, secure, and protected by federal law. Your answers can only be used to produce statistics—they cannot be used against you in any way. By law, all responses to U.S. Census Bureau household and business surveys are kept completely confidential.

Respond to the 2020 Census to shape the future.

Responding to the census helps communities get the funding they need and helps businesses make data-driven decisions that grow the economy. Census data impact our daily lives, informing important decisions about funding for services and infrastructure in your community, including health care, senior centers, jobs, political representation, roads, schools, and businesses. More than \$675 billion in federal funding flows back to states and local communities each year based on census data.

Your census responses are safe and secure.

The Census Bureau is required by law to protect any personal information we collect and keep it strictly confidential. The Census Bureau can only use your answers to produce statistics. In fact, every Census Bureau employee takes an oath to protect your personal information for life. Your answers cannot be used for law enforcement purposes or to determine your personal eligibility for government benefits.

By law, your responses cannot be used against you.

By law, your census responses cannot be used against you by any government agency or court in any way—not by the Federal Bureau of Investigation (FBI), not by the Central Intelligence Agency (CIA), not by the Department of Homeland Security (DHS), and not by U.S. Immigration and Customs Enforcement (ICE). The law requires the Census Bureau to keep your information confidential and use your responses only to produce statistics.

The law is clear—no personal information can be shared.

Under Title 13 of the U.S. Code, the Census Bureau cannot release any identifiable information about individuals, households, or businesses, even to law enforcement agencies.

The law states that the information collected may only be used for statistical purposes and no other purpose.

To support historical research, Title 44 of the U.S. Code allows the National Archives and Records Administration to release census records only after 72 years.

All Census Bureau staff take a lifetime oath to protect your personal information, and any violation comes with a penalty of up to \$250,000 and/or up to 5 years in prison.

There are no exceptions.

The law requires the Census Bureau to keep everyone's information confidential. By law, your responses cannot be used against you by any government agency or court in any way. The Census Bureau will not share an individual's responses with immigration enforcement agencies, law enforcement agencies, or allow that information to be used to determine eligibility for government benefits. Title 13 makes it very clear that the data we collect can only be used for statistical purposes—we cannot allow it to be used for anything else, including law enforcement.

It's your choice: you can respond securely online, by mail, or by phone.

You will have the option of responding online, by mail, or by phone. Households that don't respond in one of these ways will be visited by a census taker to collect the information in person. Regardless of how you respond, your personal information is protected by law.

Your online responses are safe from hacking and other cyberthreats.

The Census Bureau takes strong precautions to keep online responses secure. All data submitted online are encrypted to protect personal privacy, and our cybersecurity program meets the highest and most recent standards for protecting personal information. Once the data are received, they are no longer online. From the moment the Census Bureau collects responses, our focus and legal obligation is to keep them safe.

We are committed to confidentiality.

At the U.S. Census Bureau, we are absolutely committed to keeping your responses confidential. This commitment means it is safe to provide your answers and know that they will only be used to paint a statistical portrait of our nation and communities.

Learn more about the Census Bureau's data protection and privacy program at www.census.gov/privacy.

Laws protecting personal census information have withstood challenges.

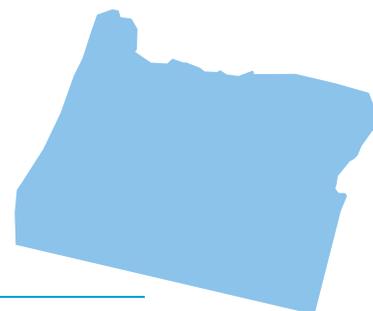

In 1982, the U.S. Supreme Court confirmed that even addresses are confidential and cannot be disclosed through legal discovery or the Freedom of Information Act (FOIA). In 2010, the U.S. Justice Department determined that the Patriot Act does not override the law that protects the confidentiality of individual census responses. No court of law can subpoena census responses.

OREGON

In FY2016, Oregon received

\$13,452,034,877

through 55 federal spending programs
guided by data derived from the 2010 Census.

The **Counting for Dollars 2020 Project** aims to understand 1) the extent to which the federal government will rely on data from the 2020 Census to guide the distribution of federal funding to states, localities, and households across the nation and 2) the impact of the accuracy of the 2020 Census on the fair, equitable distribution of these funds.

The project has analyzed spending by state for 55 federal programs (\$883,094,826,042 in FY2016). Three types of programs are analyzed:

- **Domestic financial assistance programs** provide financial assistance – including direct payments to individuals, grants, loans, and loan guarantees – to non-federal entities within the U.S. – such as individuals and families, state and local governments, companies, and nonprofits – in order to fulfill a public purpose.
- **Tax credit programs** allow a special exclusion, exemption, or deduction from gross income or provide a special credit, a preferential rate of tax, or a deferral of tax liability.
- **Procurement programs** award a portion of Federal prime contract dollars to small businesses located in areas selected on the basis of census-derived data.

The four uses of census-derived datasets to geographically allocate funding are:

- **Define eligibility criteria** – that is, identify which organizations or individuals can receive funds.
- **Compute formulas** that geographically allocate funds to eligible recipients.
- **Rank project applications** based on priorities (e.g., smaller towns, poorer neighborhoods).
- **Set interest rates** for federal loan programs.

The two categories of census-derived datasets are:

- **Geographic classifications** – the characterization (e.g., rural), delineation (e.g., Metropolitan Areas), or designation (e.g., Opportunity Zones) of specific geographic areas.
- **Variable datasets**
 - **Annual updates** of population and housing variables collected in the Decennial Census.
 - **Household surveys** collecting new data elements (e.g., income, occupation) by using the Decennial Census to design representative samples and interpret results.

Reports of the Counting for Dollars 2020 Project:

- > **Report #1:** Initial Analysis: 16 Large Census-guided Financial Assistance Programs (August 2017)*
- > **Report #2:** Estimating Fiscal Costs of a Census Undercount to States (March 2018)*
- > **Report #3:** Role of the Decennial Census in Distributing Federal Funds to Rural America (December 2018)*
- > **Report #4:** Census-derived Datasets Used to Distribute Federal Funds (December 2018)
- > **Report #5:** Analysis of 55 Large Census-guided Federal Spending Programs (forthcoming)*†
- > **Report #6:** An Inventory of 320 Census-guided Federal Spending Programs (forthcoming)

* Data available by state

Counting Young Children in the 2020 Census

Counting everyone once, only once, and in the right place

An estimated 5 percent of kids under the age of 5 weren't counted in the 2010 Census. That's about 1 million young children, the highest of any age group.

We need your help closing this gap in the 2020 Census. Here's what our research tells us about why young children are missed and what you can do to help make sure they are counted.

Common situations where young children aren't counted

How you can help?

The **child splits time between two homes**.

The child lives or stays with **another family or with another relative such as a grandparent**.

- Emphasize that the census counts **everyone where they live** and sleep most of the time, even if the living arrangement is temporary or the parents of the child do not live there.
- If the child truly spends equal amounts of time between two homes, count them where they stayed on **Census Day, April 1**. Coordinate with the other parent or caregiver, if possible, so the child is not counted at both homes.
- If it's not clear where the child lives or sleeps most of the time, count them where they stayed on Census Day, April 1.

The child lives in a **lower income household**.

- Explain to service providers and families that responding to the census helps determine **\$675 billion in local funding** for programs such as food stamps (also called the Supplemental Nutritional Assistance Program or SNAP), the National School Lunch Program, and the Children's Health Insurance Program (CHIP). When children are missed in the census, these programs miss out on funding that is based on the number of children counted.

The child lives in a household with **young parents or a young, single mom**.

- Explain that filling out the census yourself, on your own schedule, is easier than having to respond when a census worker knocks on your door. Remind these households that the form should **only take about 10 minutes** to fill out and can be done online or over the phone, in addition to mailing it back.
- Encourage moms with young children to ask other household members to count them and their children on the form if others live in the household.

The child is a **newborn**.

- Emphasize that parents should **include babies** on census forms, even if they are still in the hospital on April 1.
- **Encourage facilities** providing services to newborns to remind parents about the importance of counting their children on the census form.
- Highlight the fact that the census form only takes about 10 minutes to complete, and parents can **fill it out online or over the phone in addition to paper** at a time that works best for them.

Common situations where young children aren't counted

How you can help?

The child lives in a household that is **large, multigenerational, or includes extended or multiple families.**

- Remind the person filling out the form to count all children, including nonrelatives and children with no other place to live, even if they are only living at the address temporarily on April 1.
- Spread the word that the census **counts all people living or staying** at an address, not just the person or family who owns or rents the property.

The child lives in a household that **rents or recently moved.**

- Encourage renters and recent movers to complete their census forms **online or over the phone**, right away. That way they don't need to worry about paper forms getting lost in the move.
- **Focus efforts** on multiunit buildings that are likely to have renters.

The child lives in a household where they're **not supposed to be**, for one reason or another.

- Please explain to those that have children living in places where they aren't allowed (for example, grandparents in a seniors-only residence that have a grandchild living with them, a family with more people, including children, than the lease allows) that they should include the children because the **Census Bureau does not share information** so it can't be used against them.
- Emphasize the Census Bureau's legal commitment to keep census **responses confidential.**
- Explain that the Census Bureau **will never share information** with immigration enforcement agencies like Immigration and Customs Enforcement (ICE), law enforcement agencies like the police or Federal Bureau of Investigation (FBI), or allow this information to be used to determine eligibility for government benefits.

The child lives in a **non-English or limited-English speaking** household.

- **Conduct outreach** and create resources in non-English languages that highlight the importance of counting young children.
- **Encourage non-English speakers to self-respond** to the census and let them know that for the 2020 Census, the online form and telephone line will be available in 13 languages, including English. Language guides will be available in 59 languages other than English.

The child lives in a household of **recent immigrants or foreign-born adults.**

- Work with community members to conduct outreach in neighborhoods with recent immigrants. **Focus efforts** on the **community's gathering places** like local grocery stores, places of worship, and small restaurants.
- Emphasize the **Census Bureau's legal commitment** to keep census responses confidential. Explain that the Census Bureau will never share information with immigration enforcement agencies like Immigration and Customs Enforcement (ICE), law enforcement agencies like the police or Federal Bureau of Investigation (FBI), or allow this information to be used to determine eligibility for government benefits.

Road to the 2020 Census

2020 Census Operational Timeline

2020 Census Roadmap

The 2020 Census Statistics in Schools (SIS) program is being developed and implemented to increase awareness of, and the overall public response to, the decennial census by engaging administrators, teachers, students, and their parents/guardians in public conversations about the census. Additionally, the program will continue to promote understanding of statistical concepts and introduce the use of data to students in a variety of subjects.

Start Now!

New materials and worksheets will be coming, but get started with the SIS program now by checking out www.census.gov/schools. You'll find a wealth of resources like worksheets, fun facts and data tools that help students in grades K-12 learn key skills in a variety of subjects all by using Census Bureau data.

March
2019

August
2019

Check it Out!

New worksheets that teach all about the 2020 Census and the importance of being counted are posted to the SIS website. These lessons have been created by educators across the country in conjunction with Census Bureau data experts.

Preschool Fun!

Little ones can join in the SIS excitement. New worksheets for children ages 2-5 will be posted on the website. Additionally, check out the other great activities like a coloring and activity book and interactive song that teaches our youngest learners all about the 2020 Census.

Video Delight!

Check out the cool new videos and webisodes that help children understand what the decennial Census is and why it's important that everyone be counted.

Sept.
2019

Back to School!

Principals across the country will receive administrator kits that include many of the great materials the 2020 SIS program has to offer. Go to your principal to see the colorful maps, promotional items and other SIS materials.

Dec.
2019

March
2020

SIS Week March 2-6!

For a whole week in schools across the country educators will join forces to show how students can use the SIS program in their classrooms.

April
2020

Census Day April 1, 2020!

The 2020 Census will be officially open. Help your community by reminding your students to tell their caregivers to complete the 2020 Census form. Remember the Census provides funding for a variety of resources that help your school and community.

The 2020 Census at a Glance

Counting everyone once, only once, and in the right place.

The U.S. Census Bureau is the federal government's largest statistical agency. We are dedicated to providing current facts and figures about America's people, places, and economy. Federal law protects the confidentiality of all individual responses the Census Bureau collects.

The U.S. Constitution requires that each decade we take a count—or a census—of America's population.

The census provides vital information for you and your community.

- It determines how many representatives each state gets in Congress and is used to redraw district boundaries. Redistricting counts are sent to the states by March 31, 2021.
- Communities rely on census statistics to plan for a variety of resident needs including new roads, schools, and emergency services.
- Businesses use census data to determine where to open places to shop.

Each year, the federal government distributes hundreds of billions of dollars to states and communities based on Census Bureau data.

In 2020, we will implement new technology to make it easier than ever to respond to the census. For the first time, you will be able to respond online, by phone, as well as by mail. We will use data that the public has already provided to reduce followup visits. And, we are building an accurate address list and automating our field operations—all while keeping your information confidential and safe.

KEY MILESTONES

- 2018**
 - 2018 End-to-End Census Test
 - 2020 Census questions sent to Congress by March 31, 2018
 - Six regional 2020 Census offices and 40 area census offices open
- 2019**
 - Partnership activities launch
 - Complete Count Committees establish
 - Remaining 248 area census offices open
- 2020**
 - Advertising begins in early 2020
 - Public response (online, phone, or mail) begins
 - **Census Day—** April 1, 2020
 - In-person visits to households that haven't responded begin
 - Apportionment counts sent to the President by December 31, 2020
- 2021**
 - Redistricting counts sent to the states by March 31, 2021

[@uscensusbureau](https://twitter.com/uscensusbureau)

Overview of Census Bureau Programs

CENSUSES

- The **decennial census** is the once-a-decade population and housing count of all 50 states, the District of Columbia, Puerto Rico, and the Island Areas. The results of the census determine the number of seats for each state in the U.S. House of Representatives and are used to draw congressional and state legislative districts. Federal agencies use the results to distribute more than \$675 billion in federal funds each year.
- The **economic census** measures the nation's economy every five years, providing vital statistics for virtually every industry and geographic area in the country.
- The **Census of Governments** provides comprehensive data about the 90,000 state and local governments in the nation every five years.

SURVEYS

- The **American Community Survey** (ACS) is an ongoing national survey—sampling approximately 3.5 million addresses annually—that provides vital information about our nation's housing and people. The ACS is the only source of comparable, quality information about the people in all our communities. These data show what the U.S. population looks like and how it is changing. ACS data are used to assess the past and present and to plan for the future.
- **Demographic surveys** measure income, poverty, education, health insurance coverage, housing quality, crime victimization, computer usage, and many other subjects.
- **Economic surveys** are conducted monthly, quarterly, and yearly. They cover selected sectors of the nation's economy and supplement the economic census with more-frequent information about the dynamic economy. These surveys yield more than 400 annual economic reports, including principal economic indicators.
- **Sponsored surveys** are demographic and economic surveys that we conduct for other government agencies. They include the Current Population Survey, the National Health Interview Survey, and the National Survey of College Graduates.

Your information is protected by law

The law requires the Census Bureau to keep your information confidential and use your responses only to produce statistics. We cannot publicly release your responses in any way that could identify you. We will never share your information with immigration enforcement agencies such as ICE, law enforcement agencies such as the FBI or police, or allow it to be used to determine your eligibility for government benefits.

Our Mission

To serve as the nation's leading provider of quality data about its people and economy.

Our Vision

To be the trusted source for timely and relevant statistical information, and the leader in data-driven information.

Census History

Thomas Jefferson directed the first decennial census in 1790. As required by the U.S. Constitution, a census has been taken every 10 years thereafter. In 1840, the Census Act authorized the establishment of a centralized Census Office. In 1902, the Census Office became a permanent organization within the Department of the Interior. A year later, it was renamed the Bureau of the Census and moved to the new Department of Commerce and Labor.

Other Uses of Census Data

- State legislative districts, school districts, voting precincts
- State, local and tribal governments planning decisions
- Business and nonprofit decisions (where to locate, size of market)
- Local trends
- Population benchmarks

What's New for 2020

1. Easier To Respond

- Internet
- Toll-free Number
- Paper

2. More Technology

- Field workers will use mobile devices

The Road to 2020

What Do We Ask?

1. Address
2. Phone Number
3. Count of Each Person At That Address
4. Name
5. Gender
6. Age and Date of Birth
7. Race
8. Hispanic, Latino or Spanish Origin
9. Whether Someone Lives Somewhere Else
10. Relationship
11. Citizenship *

How It Will Work

Nearly every household will receive an invitation to participate from a postal worker or a census worker

 **95%** of households will receive their census invitation in the mail.

How It Will Work

WHAT WE WILL SEND IN THE MAIL	
On or between	You'll receive:
March 12-20	An invitation to respond online to the 2020 Census. (Some households will also receive paper questionnaires.)
March 16-24	A reminder letter.
	If you haven't responded yet:
March 26-April 3	A reminder postcard.
April 8-16	A reminder letter and paper questionnaire.
April 20-27	A final reminder postcard before we follow up in person.

Private and Confidential

- Only aggregate data reported
- Prohibited by law from releasing personal information to any person or organization (USC, Title 13) *
- Life-time oath by all Census Bureau employees
- Penalties for wrongful disclosure: up to 5 years imprisonment and/or a fine of \$250,000

Measuring America: People, Places, and the Economy

Partner with the U.S. Census Bureau to
help America work better through data

Partnership

Working Together

Educate people about the 2020 Census and foster cooperation with enumerators.

Encourage people to self-respond.

Engage organizations to reach out to hard-to-count groups and those who aren't motivated to respond to the national campaign.

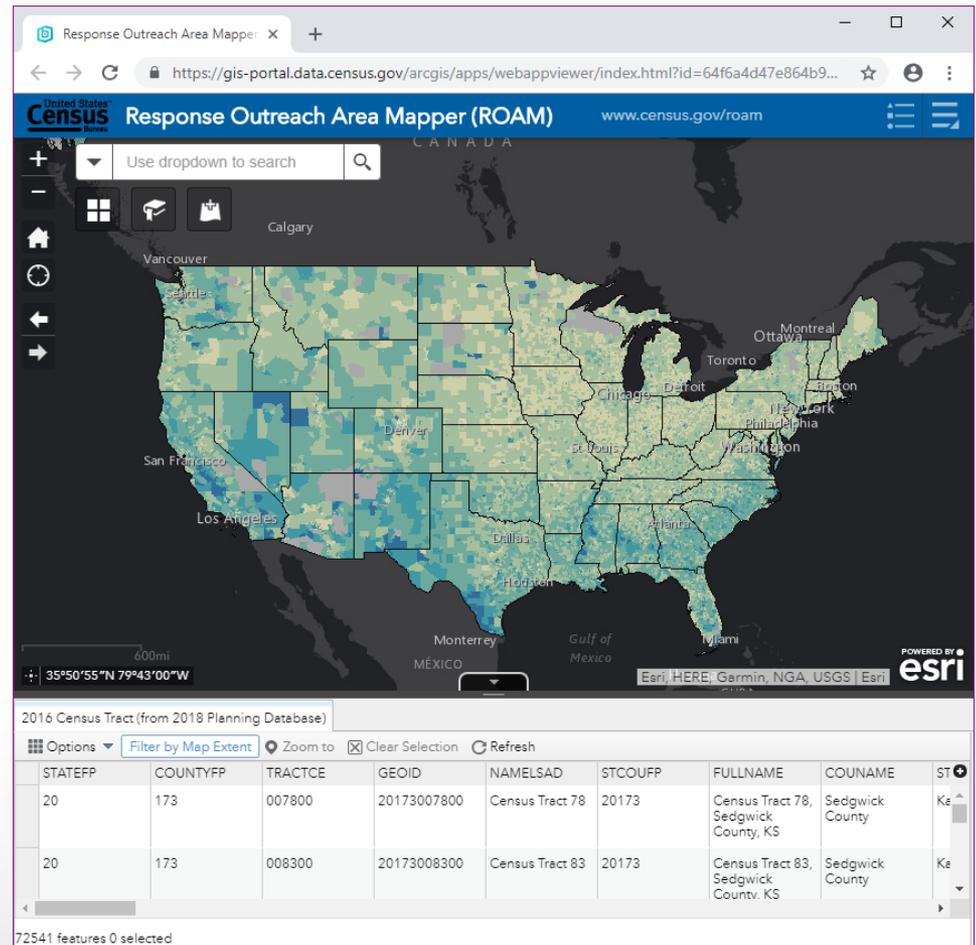

Hard-to-Count Populations

- Foreign-born/Immigrants
- Children younger than 5
- Seniors
- Homeless
- Migrant workers
- Renters
- Low internet access

ROAM

- Response Outreach Area Mapper
- Public application that displays characteristics of hard-to-count area
- Census tract level

Who told you this stuff?

The U.S. Census Bureau takes a census of the population every 10 years, and censuses of economic activity and governments every five years. And every year, the Census Bureau conducts more than 100 other surveys. Data on this page come from the 2010 Census, the American Community Survey, Population Estimates, County Business Patterns, and Puerto Rico Community Survey.

How are these data collected?

The U.S. Census Bureau sends questionnaires in the mail or contacts businesses and households to participate in its surveys.

* State and Island Area symbol information was obtained from various non-Census Bureau resources including state web sites, educational web sites, and commercial entities.

Example: Activities (English)

Activities

"To Kill a Mockingbird": An Introduction to 1930s America

Activity Description

This activity teaches students about the setting of Harper Lee's famous novel "To Kill a Mockingbird," which takes place during 3 years (1933–1935) of the Great Depression. Part 1 of this activity can be used before students start reading the novel to help them understand what life was like in the 1930s. In this part, students will examine and answer questions about census documents that feature unemployment numbers and related information. Part 2 can be completed after students have read the first few chapters of the novel. In this part, students will write a piece using the RAFT technique (role, audience, format, topic) to show what they learned about the 1930s and what they have read so far.

Suggested Grade Level

9–10

Materials Required

- The student version of this activity, 12 pages

Teacher Notes

Blooms Taxonomy

Understanding

Students will **understand** what life was like in the 1930s.

Students will **apply** what they learned about the 1930s as well as what they read in Chapters 1–3 of "To Kill a Mockingbird" to complete a assignment.

(Recruiting Hotline)

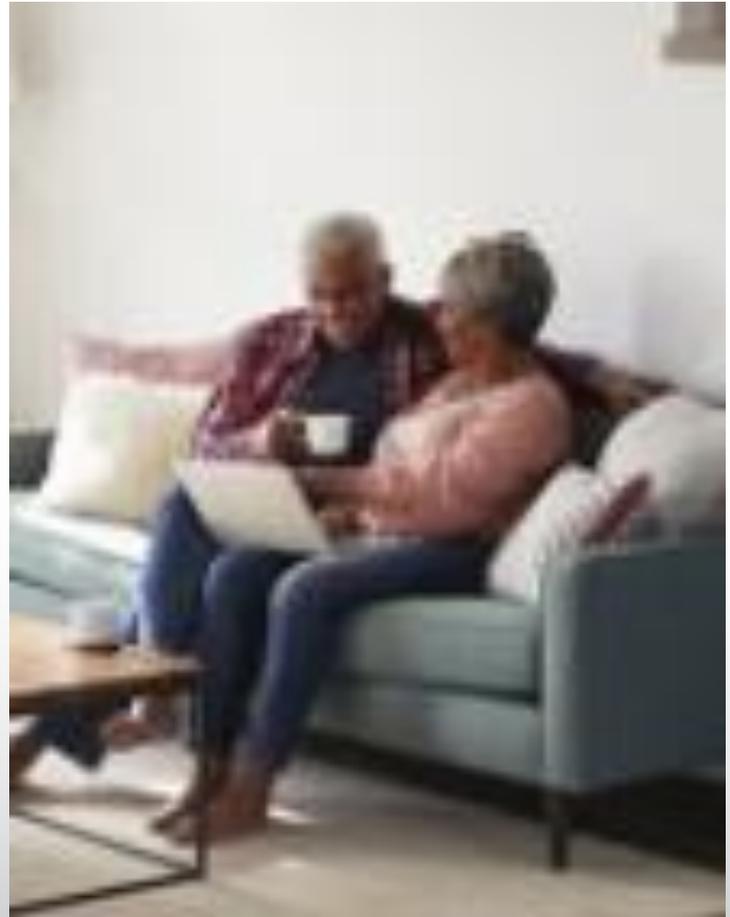

Next Steps

What You Can Do

- ✓ Work to mobilize your community
- ✓ Build awareness
- ✓ Identify community areas that need special attention
- ✓ Recruit trusted voices in the community

Good Ideas

- Put 2020 Census information on your website
- Insert a link for jobs on your website
- Activate social media
- Record a 2020 Census message on your organization voicemail
- Display Census posters and flyers

Stay Connected: 2020 Census

facebook.com/uscensusbureau

twitter.com/uscensusbureau

youtube.com/uscensusbureau

Good Ideas

- Engage with local schools
- E-blast to employees
- Displays/Fast Facts
- Promote the library as a “census hotspot” – internet access to complete the census

Key Dates

Date	Items
2019	Validate all residential units in the county
Early 2020	Advertising Campaign
23 March 2020	Online portal opens
1 April 2020	CENSUS DAY!
April-June 2020	Non-response Follow Up Quality Control
31 Dec 2020	Results delivered to the president
31 Mar 2021	Results delivered to the states

Thank You!

WASHINGTON

In FY2016, Washington received

\$16,676,186,274

through 55 federal spending programs guided by data derived from the 2010 Census.

The **Counting for Dollars 2020 Project** aims to understand 1) the extent to which the federal government will rely on data from the 2020 Census to guide the distribution of federal funding to states, localities, and households across the nation and 2) the impact of the accuracy of the 2020 Census on the fair, equitable distribution of these funds.

The project has analyzed spending by state for 55 federal programs (\$883,094,826,042 in FY2016). Three types of programs are analyzed:

- **Domestic financial assistance programs** provide financial assistance – including direct payments to individuals, grants, loans, and loan guarantees – to non-federal entities within the U.S. – such as individuals and families, state and local governments, companies, and nonprofits – in order to fulfill a public purpose.
- **Tax credit programs** allow a special exclusion, exemption, or deduction from gross income or provide a special credit, a preferential rate of tax, or a deferral of tax liability.
- **Procurement programs** award a portion of Federal prime contract dollars to small businesses located in areas selected on the basis of census-derived data.

The four uses of census-derived datasets to geographically allocate funding are:

- **Define eligibility criteria** – that is, identify which organizations or individuals can receive funds.
- **Compute formulas** that geographically allocate funds to eligible recipients.
- **Rank project applications** based on priorities (e.g., smaller towns, poorer neighborhoods).
- **Set interest rates** for federal loan programs.

The two categories of census-derived datasets are:

- **Geographic classifications** – the characterization (e.g., rural), delineation (e.g., Metropolitan Areas), or designation (e.g., Opportunity Zones) of specific geographic areas.
- **Variable datasets**
 - **Annual updates** of population and housing variables collected in the Decennial Census.
 - **Household surveys** collecting new data elements (e.g., income, occupation) by using the Decennial Census to design representative samples and interpret results.

Reports of the Counting for Dollars 2020 Project:

- > **Report #1:** Initial Analysis: 16 Large Census-guided Financial Assistance Programs (August 2017)*
- > **Report #2:** Estimating Fiscal Costs of a Census Undercount to States (March 2018)*
- > **Report #3:** Role of the Decennial Census in Distributing Federal Funds to Rural America (December 2018)*
- > **Report #4:** Census-derived Datasets Used to Distribute Federal Funds (December 2018)
- > **Report #5:** Analysis of 55 Large Census-guided Federal Spending Programs (forthcoming)*†
- > **Report #6:** An Inventory of 320 Census-guided Federal Spending Programs (forthcoming)

THE U.S. CENSUS BUREAU IS AN EQUAL OPPORTUNITY EMPLOYER

Why We Ask

The 2020 Census is easy. The questions are simple.

The census asks questions that provide a snapshot of the nation. Census results affect your voice in government, how much funding your community receives, and how your community plans for the future.

When you fill out the census, you help:

- Determine how many seats your state gets in Congress.
- Guide how [more than \\$675 billion](#) in federal funding is distributed to states and communities each year.
- Create jobs, provide housing, prepare for emergencies, and build schools, roads and hospitals.

Population Count (Number of People Living or Staying)

We ask this question to collect an accurate count of the number of people at each address on Census Day, April 1, 2020. Each decade, census results determine how many seats your state gets in Congress. State and local officials use census counts to draw boundaries for districts like congressional districts, state legislative districts and school districts.

Any Additional People Living or Staying

Our goal is to count people once, only once and in the right place according to where they live on Census Day. Keeping this goal in mind, we ask this question to ensure that everyone living at an address is counted.

Owner/Renter

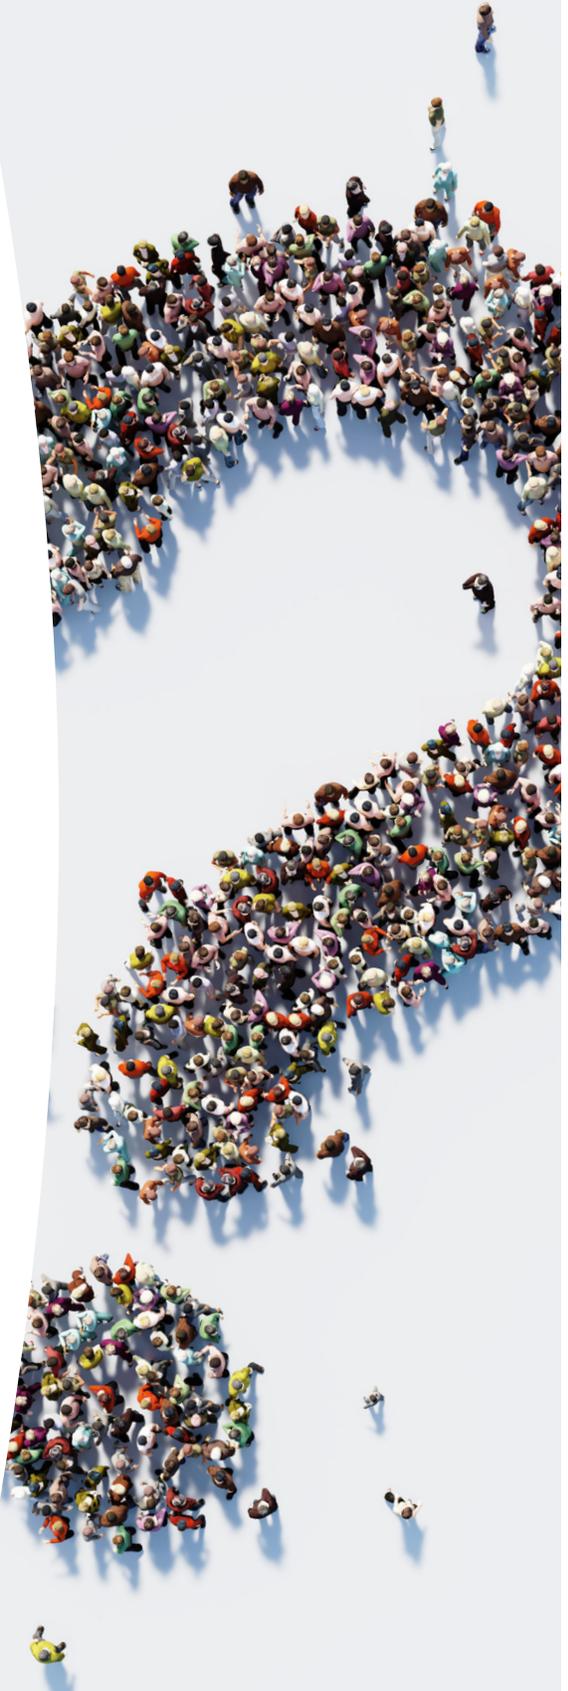

We ask about whether a home is owned or rented to create statistics about homeownership and renters. Homeownership rates serve as an indicator of the nation's economy and help in administering housing programs and informing planning decisions.

Phone Number

We ask for a phone number in case we need to contact you. We will never share your number and will only contact you if needed for official Census Bureau business.

Name

We ask for names to ensure everyone in the house is counted. Listing the name of each person in the household helps respondents include all members, particularly in large households where a respondent may forget who was counted and who was not.

Sex

We ask about the sex of each person to create statistics about males and females. Census data about sex are used in planning and funding government programs, and in evaluating other government programs and policies to ensure they fairly and equitably serve the needs of males and females. These statistics are also used to enforce laws, regulations and policies against discrimination in government programs and in society.

Age and Date of Birth

We ask about age and date of birth to understand the size and characteristics of different age groups and to present other data by age. Local, state, tribal and federal agencies use age data to plan and fund government programs that provide assistance or services for specific age groups, such as children, working-age adults, women of childbearing age, or the older population. These statistics also help enforce laws, regulations and policies against age discrimination in government programs and in society.

Hispanic, Latino or Spanish Origin

We ask about whether a person is of Hispanic, Latino or Spanish origin to create statistics about this ethnic group. The data collected in this question are needed by federal agencies to monitor compliance with anti-discrimination provisions, such as under the Voting Rights Act and the Civil Rights Act.

Race

We ask about a person's race to create statistics about race and to present other statistics by race groups. The data collected in this question are needed by federal agencies to monitor compliance with anti-discrimination provisions, such as under the Voting Rights Act and the Civil Rights Act. State governments use the data to determine congressional, state and local voting districts.

Whether a Person Lives or Stays Somewhere Else

Our goal is to count people once, only once and in the right place according to where they live on Census Day. Keeping this goal in mind, we ask this question to ensure individuals are not included at multiple addresses.

Relationship

We ask about the relationship of each person in a household to one central person to create estimates about families, households and other groups. Relationship data are used in planning and funding government programs that provide funds or services for families, people living or raising children alone, grandparents living with grandchildren, or other households that qualify for additional assistance.

Citizenship

A question about a person's citizenship is used to create statistics about citizen and noncitizen populations. These statistics are essential for enforcing the Voting Rights Act and its protections against voting discrimination. Knowing how many people reside in the community and how many of those people are citizens, in combination with other information, provides the statistical information that helps the government enforce Section 2 of the Voting Rights Act and its protections against discrimination in voting.

50 Ways Census Data Are Used

- Decision making at all levels of government.
- Drawing federal, state, and local legislative districts.
- Attracting new businesses to state and local areas.
- Distributing over \$300 billion in federal funds and even more in state funds.
- Forecasting future transportation needs for all segments of the population.
- Planning for hospitals, nursing homes, clinics, and the location of other health services.
- Forecasting future housing needs for all segments of the population.
- Directing funds for services for people in poverty.
- Designing public safety strategies.
- Development of rural areas.
- Analyzing local trends.
- Estimating the number of people displaced by natural disasters.
- Developing assistance programs for American Indians and Alaska Natives.
- Creating maps to speed emergency services to households in need of assistance.
- Delivering goods and services to local markets.
- Designing facilities for people with disabilities, the elderly, or children.
- Planning future government services.
- Planning investments and evaluating financial risk.
- Publishing economic and statistical reports about the United States and its people.
- Facilitating scientific research.
- Developing “intelligent” maps for government and business.
- Providing proof of age, relationship, or residence certificates provided by the Census Bureau.
- Distributing medical research.
- Reapportioning seats in the House of Representatives.
- Planning and researching for media as backup for news stories.
- Providing evidence in litigation involving land use, voting rights, and equal opportunity.
- Drawing school district boundaries.
- Planning budgets for government at all levels.
- Spotting trends in the economic well-being of the nation.
- Planning for public transportation services.
- Planning health and educational services for people with disabilities.
- Establishing fair market rents and enforcing fair lending practices.
- Directing services to children and adults with limited English language proficiency.
- Planning urban land use.
- Planning outreach strategies.
- Understanding labor supply.
- Assessing the potential for spread of communicable diseases.
- Analyzing military potential.
- Making business decisions.
- Understanding consumer needs.
- Planning for congregations.
- Locating factory sites and distribution centers.
- Distributing catalogs and developing direct mail pieces.
- Setting a standard for creating both public and private sector surveys.
- Evaluating programs in different geographic areas.
- Providing genealogical research.
- Planning for school projects.
- Developing adult education programs.
- Researching historical subject areas.
- Determining areas eligible for housing assistance and rehabilitation loans.
