HTML Quick Tips

- W3Schools.com – for html tips  https://www.w3schools.com/html/
- This piece of code removes blank lines added underneath images - Mobile view <br clear="left"/>
- This piece of code sets a Youtube Video to fit within parameters of a Mobile screen
  <div class="video-container">embedded code here</div>
- Removing table border lines: set up your table first. After your table is complete - click on table borders > choose table icon in wysiwyg editor > under class - choose (value - at the very bottom of the list) > enter "borderless" (without quotes) in the field and update table
