Registration Open for Neurodivergence & Libraries Summit!

The [2023 WLA Neurodivergence & Libraries Summit](#) will be held online **next week** on Friday, Sept. 8. All registration types are now open.

Note: The Washington State Library, the State Library of Oregon, and the Idaho Commission for Libraries have all purchased state-wide access, which means ***all library employees in Washington, Oregon, and Idaho can access the summit for free!***

Thank you to the Washington and Oregon State Libraries and the Idaho Commission for Libraries for providing all library employees in your states with access to the summit!

Employees in Washington: request your discount code and registration instruction by [submitting this form](#).

Employees in Oregon and Idaho: please stay tuned for communication and instructions for registration from the State Library of Oregon and the Idaho Commission for Libraries.

The virtual Neurodivergence & Libraries Summit will offer day-long programming around neurodivergence: a broad overview of what neurodivergence is, how to improve library services for your neurodivergent patrons, current research around the experiences of neurodivergent library workers, conversations around special autism libraries, and more.

Whether you are new to the field or deeply versed, we are hoping that a gentle program that offers breaks, time for questions, and different presentation styles will equip you to feel more confident and to serve as an advocate for your neurodivergent patrons and staff. All sessions will be recorded and made available to all registrants.

Save the Date for the ACRL-WA & OR Joint Conference

ACRL-WA & OR will be holding their joint Fall conference **in-person** and **online Friday, Oct. 27 from 8 am - 5 pm** at Lower Columbia College in Longview, WA. Early Bird and virtual registration will open Sept. 6. [Registration rates are now available.](#)

The conference theme is **The Work of Libraries**. People, and their labor, are the core of academic libraries. This work can be exciting, monotonous, high stakes, invisible, precarious, invigorating, and exhausting. Like other forms of labor, work in academic libraries has changed dramatically since the advent of the pandemic, and continues to change.

PLA Presents: Super Searchers for Library Workers

The ease with which misinformation can be created and spread online endangers everyday discourse—and libraries are uniquely suited to help counteract its negative effects. Using research developed at University of Washington, Google has created a new set of tools for evaluating material found online, making it easier to think critically about the veracity of digital information right at the point of search. In this interactive presentation, library consultant Toby Greenwalt will demonstrate the capabilities of Super Searchers and showcase potential applications in the library workspace.

This webinar will be held Sept. 19 at 11:00 a.m. [Register here to attend.](#)
